

# CAPABILITIES STATEMENT

TalaTek helps organizations manage cyber risk, strengthen security and ensure privacy

TalaTek is a wholly owned subsidiary of CISO Global, dedicated to delivering independently and impartially our services in risk management, cybersecurity, compliance, continuous monitoring, security architecture and engineering, readiness and resiliency, and managed services. We are a Federal Risk and Authorization Management Program (FedRAMP)-accredited third-party assessment organization (3PAO) and are also accredited by the American Association for Laboratory Accreditation (A2LA) to conduct security controls assessments for cloud

systems and to provide advisory services to cloud service providers. In addition, we are an AWS Validated Public Sector Partner.

## TalaTek has the following:

- GSA MAS SINS: 518210C, 5415 HACS, 5415S
- NAICS codes: 541511, 541512, 541513, and 541519
- ISO/IEC 17020: 2012 Certified

## TalaTek Approach

TalaTek offers expert advisory services in risk management, security, assessment, and compliance. We help organizations strategically protect their data based on business risks and meet ever-expanding regulatory compliance requirements. We deliver unparalleled IT security and risk management based on National Institute of Standards and Technology (NIST), Cyber Security Framework (CSF), and ISO 27001, to name a few.

We specialize in implementing compliance frameworks and solutions to meet Federal Information Security Modernization Act (FISMA), General Data Protection Regulation (GDPR), Health Insurance Portability and Accountability Act (HIPAA), Payment Card Industry (PCI), various privacy standards, and other regulations for our clients.

Combining our team's security analysis and architecture expertise with our understanding of compliance and

regulatory standards, we work tirelessly to deliver accurate, thorough and detailed assessments and strategic advice to our customers. Our staff bring decades of experience in all aspects of information security, with certifications including Project Management Professional (PMP), Certified Cloud Security Professional (CCSP), Certified Information Systems Security Professional (CISSP), PCI Qualified Security Assessor, Certified Ethical Hacker, CompTIA Security and Network +, and AWS certifications.

Our corporate clients rely on TalaTek's strategic approach to IT security, risk management, third-party supply chain management, loss prevention, and disaster recovery. Thanks to our track record of success at federal agencies, our government/public sector clients turn to our expertise in risk management, governance, and compliance, citing our detailed approach, thorough understanding of their business, and outstanding quality of work.

# CAPABILITIES STATEMENT

## Risk Management

-  Gap Analysis
-  Risk Assessment
-  Advisory Services
-  Cyber Security Services
-  Third-Party Risk Management
-  Incident Response/Planning
-  Data Loss Prevention
-  Policies and Procedures
-  Penetration Testing/Vulnerability Management
-  Cyber Threat Hunting

## TiGRIS: FedRAMP-Accredited SaaS GRC

Our TalaTek intelligent Governance and Risk Integrated Solution (TiGRIS) is a cloud-based platform that is a FedRAMP-authorized managed software as a service (SaaS). TiGRIS provides efficient and highly scalable services that ensure high quality, consistent, and repeatable delivery across multiple systems, standards and regulatory requirements for a holistic risk management approach.

As 3PAO advisors, we can provide AWS architectural review and development support to ensure each client's SaaS solution is designed and implemented from the ground up to meet FedRAMP's rigorous security requirements.

- Cloud-Based Security Gap Analysis
- Third-Party Cloud-Based Security Assessment
- Cloud-Based Architecture Review

## 3PAO Advisory Services

As an A2LA accredited 3PAO that has undergone the rigorous FedRAMP process as a CSP as well as a 3PAO, we understand the regulations, frameworks, controls, and processes necessary to achieve and maintain FedRAMP authorization. We assist our clients in preparing the

FedRAMP Security Assessment & Authorization (SA&A) package and perform the required continuous monitoring tasks so the SaaS achieves FedRAMP certification and continues to maintain its authorization.

## AWS Cloud-Based Architecture

TalaTek cloud engineers are AWS professionals who specialize in designing and implementing state-of-the-art, cost-efficient, and secure cloud-based systems. Our architecture review takes a deep dive into an organization's cloud-based architecture, advises on potential areas of

inefficiency and vulnerability, and provides actionable remediations to address those issues. We also offer guidance and suggestions on deployment solutions to help reduce overall costs, ensure data security, and expedite implementation time.
